

Senior Center without Walls

Program Summary

For participants who are unable to attend a brick and mortar senior center – due to disability, illness or other access issue – creative solutions are needed for outreach and engagement. Senior Center Without Walls is a program available through Episcopal Senior Communities which offers participation via the telephone for those who cannot come in to a senior center. All activities take place on the telephone through a special toll-free number.

Episcopal Senior Communities provides housing and services to seniors, support independence and encourages continued intellectual, physical, social, and spiritual growth.
